EDUCATION

Indraprastha Institute of Information Technology, Delhi (IIIT Delhi)
B.Tech in Computer Science and Applied Mathematics

2021 – 2025

WORK EXPERIENCE

Frontend Developer Intern – Unsaid Talks (EdTech Startup)

Feb 2025 – May 2025

- Led frontend development for **AEDP (Apprenticeship Embedded Development Program)** with cross-functional team collaboration
- Designed and developed responsive landing page using **React, TypeScript, Tailwind CSS, and Vite**
- Integrated **WordPress** backend with modern frontend technologies and deployed using **Graphy and Frappe CMS**

Tech & Content Intern – Vidyaichuk (EdTech Startup)

Aug 2024 – Dec 2024

- Built complete edtech platform website using **WordPress** hosted on **Amazon Web Services LightSail**
- Developed separate **React-based course content section** and integrated with WordPress via embedded links
- Managed deployment pipeline, server configuration, and curated CS curriculum for production environment

PROJECTS

Algo Trading Platform [link]

Recent

- Built full-stack trading platform using **MERN stack** with **Dhan API integration** for real-time market data and order execution
- Implemented **JWT authentication and session management** for secure user access with automated reconnection logic
- Developed responsive UI for live portfolio monitoring with **MongoDB** database and **Express.js** backend architecture

Flood Prediction Using Machine Learning [link]

Aug 2024 – Dec 2024

- Built flood probability prediction system processing **1.8M+ data entries** and 20+ environmental factors
- Trained multiple machine learning models including **MLP, SVM, and Random Forest**; achieved **86% accuracy (R² score 0.86)** with MLP
- Optimized model performance through hyperparameter tuning and implemented data visualization using **Matplotlib and Pandas**

Royal Mart - Multi-User E-commerce System [link]

Previous

- Developed comprehensive retail management system with **Python** and **MySQL**, featuring multi-user roles and inventory management
- Implemented secure authentication system with role-based access control for admin, supplier, and customer interfaces
- Built complete order processing system with shopping cart, wallet integration, and normalized database schema with 8+ tables

TECHNICAL SKILLS

- **Programming Languages:** Python, C/C++, Java, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Frontend Technologies:** React.js, TypeScript, Tailwind CSS, HTML5, CSS3, Responsive Web Design
- **Backend Technologies:** Node.js, Express.js, Flask, REST APIs, WebSocket, JWT Authentication
- **Databases & Cloud:** MySQL, PostgreSQL, MongoDB, AWS LightSail, Firebase
- **Development Tools:** Git, Vite, WordPress, libGDX, Pygame, Version Control
- **Core Competencies:** Full-Stack Development, Machine Learning, Data Structures & Algorithms, Database Design

ACHIEVEMENTS & LEADERSHIP

- Ranked **1253 out of 30,000+** participants in Codeforces Division 2 Contest; solved **500+ DSA problems** on LeetCode/CodeChef
- Certified in **Competitive Programming (CP1/CP2)** and **Haskell** by University of Helsinki
- Selected among **4 students nationwide** for Nobel Prize Series conference in Goa
- **Volunteer Educator** at Teach Like a Friend x Vidya Vikas: Taught CS, physics, and mathematics to grades 8-12 students
